Yerba Mate
RANGE: Paraguay, Uruguay, Argentina and Brazil

Used as a stimulant, an antidepressant, and a diuretic. Yerba Mate is also consumed as a hot beverage by millions throughout South America. High in minerals and caffeine.

Welcome to the Latin American Ethnobotanical Garden!
Contributed to the world, this garden is managed by the Latin American and Caribbean Studies Institute (LACSI), headquartered in the study of their traditional knowledge and wisdom of a people concerning plants and their many uses.
From the USA, anthropology professor Brent and Ekka Ayo for this special field course examining how the indigenous four-way Mayan of Chiapas, Mexico make use of plants for medicine. This garden pays tribute to the rich history of traditional Latin American plant use. It includes a small sample of the thousands of plant species used by the Maya and other indigenous Latin American peoples for healing and much more.
