Science Corner

The DNA in a single cell in your body is longer than you. If you stretch all your strands of DNA and place them from end to end, the tape would be about twice the diameter of the entire solar system.

The rarest combination of genetic traits is red hair and blue eyes. Both of those genes are recessive, and only one percent of humans have the combination.

If you hate to eat your broccoli, blame it on your genes. Some people have inherited taste buds that react strongly to the bitterness in cabbage, broccoli and other plants in the Brassica genus. Broccoli may be good for you, but tell that to your tongue. Good luck sharing this handy fact with your mom.
