

HOW TO MAKE A POSTER HOLDER

1. Cut 2 pieces of heavy cardboard 30 inches wide and 30 inches long. (Use something like a refrigerator box)

2. Taper the top off to look like this. You should begin tapering the top about 6 inches from the top.

3. On each piece, cut holes about 2 inches from the top, big enough to put your hands through for handles.
4. To make the handles stronger, reinforce the top by wrapping it with tape. If you cut the holes too close to the top or don't tape them, they will tear easily.
5. Staple the two pieces together along the sides and bottom about 1/4 inch from the edge. Cover the seam with tape. (Come look at the one at the office if you don't understand.)
6. Be sure to neatly write your name and county on one side.
