

4-H VEX IQ Challenge Robotics Competition Team

The 4-H VEX IQ Challenge Robotics team consists of highly motivated and dedicated **4th-8th graders** that wish to spend time, weekly, almost year-round, to design, build, program and drive robots (<https://www.vexrobotics.com/iq/competition/viqc-current-game>) for competitions around the state and hopefully worlds!

Members can be in public, private and homeschool. There are a VERY LIMITED number of spots on the team. All students (even those returning from previous seasons) are required to submit an application. The application may be used by coaches to determine which students will be invited to tryout and eventually join the team. Applications will be available from the 4-H office in the spring.
